Week #3

APLIKASI WEB ADMIN PEMESANAN JASA ANALISIS LPSB

Presented by Rendi Yuda Perkasa & Zaki Geyan

Capaian & Target

Pengembangan sistem

day
11

day
12

day
13

day
14

day
15

Menyelesaikan fungsi
Authentication

Update halaman login
pada Front-end

Menyambungkan tiga
halaman pesanan dengan
database

Menyambungkan detail
pesanan & validasi
pembayaran ke database

Menyambungkan fungsi
lainnya dengan database

Week
2

Back-end web admin
sudah dirancang

Status: Selesai

Week
3-4

Menyelesaikan back-end
dan testing aplikasi pada
klien

Status: Dalam proses

Week
5

Set-up server

Week
6-7

Deployment

Front-end Login Admin

```
<form action="{{ route('admin.auth.loginAdmin') }}" method="POST">
    @csrf
    <div class="form-group has-feedback">
        <input id="email" name="email" type="email" class="form-control{{ $errors->has('email') ? ' is-invalid' : '' }}"
            value="{{ old('email') }}" required autofocus>
        @if ($errors->has('email'))
            <span class="invalid-feedback" role="alert">
                <strong>{{ $errors->first('email') }}</strong>
            </span>
        @endif
        <span class="glyphicon glyphicon-envelope form-control-feedback"></span>
    </div>
    <div class="form-group has-feedback">
        <input id="password" name="password" type="password" class="form-control{{ $errors->has('password') ? ' is-invalid' : '' }}"
            required>
        @if ($errors->has('password'))
            <span class="invalid-feedback" role="alert">
                <strong>{{ $errors->first('password') }}</strong>
            </span>
        @endif
        <span class="glyphicon glyphicon-lock form-control-feedback"></span>
    </div>
```

Back-end Fungsi loginAdmin

```
49     public function loginAdmin(Request $request)
50     {
51         // Validate the form data
52         $this->validate($request, [
53             'email'    => 'required|email',
54             'password' => 'required|min:6'
55         ]);
56         // Attempt to log the user in
57         if (Auth::guard('admin')->attempt(['email' => $request->email, 'password' => $request->password],
58             $request->remember)) {
59             // if successful, then redirect to their intended location
60             return redirect()->intended(route('admin.dashboard'));
61         }
62         // if unsuccessful, then redirect back to the login with the form data
63         return redirect()->back()->withInput($request->only('email', 'remember'));
64     }
65
66     public function logout()
67     {
68         Auth::guard('admin')->logout();
69         return redirect()->route('admin.auth.login');
70     }
```

Kendala Pada pengembangan sistem

THANK YOU!
